Perkins. 1675.

A

Prognostication for the
year of our Lord God,
1675.

Being the third after Bissextile, or
Leapyear, and from the Worlds
Creation, 5638.

Wherein is contained the description of
the four quarters of the year : As also a
Chronological Table of many things worth
remembrance, since the Creation, until this
present year, 1675. Collected for the most
part out of Ecclesiastical History, and other
good Authors, something augmented.

By F. PERKINS, Well-willer
to the Mathematicks.

Printed at London by Robert 19bize, for the Com-
pany of Stationers, 1675. Cum Privilegio.

A Description of the four Quarters of the Year, and first of Winter.

☉ in ♏ ≈ ✕.

ACcording to the custom of writers in this kind, Winter Quarter is the first Quarter, which took beginning the 11. day of *December*, at which time the Sun entred into the first degree of the cold and dry sign *Capricorn*, being the most remote from us in his farthest South declination, causing the days with us to be shortest, and the nights longest: Which Quarter continuing until the Sun hath slowly passed through *Capricorn*, *Aquarius*, and *Pisces*. This Quarter doth naturally resemble Old age.

Of the Spring.

☉ in ♈ ∞ II.

THis Quarter doth take beginning the 10. of *March*, at which time the Sun entred into the first minute of *Aries*, and doth continue whilst the Sun is passing these 3. vernal signs, *Aries*, *Taurus*, and *Gemini*. This Quarter doth resemble growing youth.

Of Summer.

☉ in ♋ ∞ III.

THe Summer Quarter doth take his beginning when the Sun doth enter into the first degree of *Cancer*, which will be this year the 11. of *June*, and doth continue whilst the Sun passeth through *Cancer*, *Leo*, *Virgo*, now are the days longest, and the air hottest; therefore but for necessity, bid Physick Adieu.

Of Autumn.

☉ in ♎ ∞ IV.

Autumn or Harvest Quarter (commonly called the Fall of the Leaf, of some the latter Spring) doth begin when the Sun doth enter into the first degree of *Libra*, making again the day and the night of equal length; Which will be this year, the 13. of *September*, and doth continue whilst the Sun doth pass through *Libra*, *Scorpio*, and *Sagittarius*. This Quarter doth fitly resemble declining age, and Phlegmatick complexion.

A Prognostication.

THere will be five Eclipses this year 1675. viz. two of the Sun, and three of the Moon.

The first will be of the Moon on N: w-years-day, a total Eclipse, the beginning 34. m n. past 5. at night; the middle 30. min. past 7. when it will be totally darkened; the end 25. min. past 9. The second is of the Sun 13. June about 6. in the morning, hardly visible in England. The third is of the Moon 27. June about 3. in the morning, a great part of it will be visible to us, but not the latter end. The 4. will be of the Sun 6. December about 4. after noon. The 5. will be of the Moon 22. of December about 3. morning, but neither of them visible to us in England.

Excellent Notes of Husbandry and Gardening for each Moneth in the Year.

January Observations.

In this moneth cut down timber (and it shall not cleave nor be eaten with worms) in the last quarter of the Moon set of some kernels and Bay-rees, yinnet and Bees, set Nut-trees, Rose-trees, Peaches, Philbirds, and Plum-trees. if the frosts be not too hard, prune and lop them; before full Moon sow and set Beans and Peas, and dung Land: in the last quarter geld Cattel to rear, fallow Land for wheat and Rye, scratch Gardens with dung, and remove Wees: and for your own health keep your body warm, let good and wholesome Diet be your Physician, moderate Exercise and Labo; your answer to crasse Appetite.

February Observations.

Sow all sorts of Peas, and other pulse, some mustard-seed, cast up dikes, set and plant vines, hops, gooseberries, and any fruit that grows upon bushes, prune and trim all sorts of fruit-trees from moss, canker, and all superfluous branches, graft in the latter end of the Moneth, sow onions in cold stiff land, take heed of cold, forbear Phlegmatick meats.

March Observations.

In the new of the Moon (the wind any way but south or west) graft pines, wardens of apple-trees, make an end of sowing all manner of pulse, and begin to sow oats, barley, parsnips, onions, carrots, cucumbers, melons, and all kinde of pot-herbs, dig Quarterbocks and sage, geld lambs, let blood according to strength and necessity, the sign and weather being also fit (but repare to the learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the year after.

April Observations.

Sow barley, hemp and flax, pale hops, set and sow all kind of Garden herbs, open alders, and let men labor for their living, let Tanners now provide them with bark, and all good Huswives look to their Dairies, bleed and purge with advice those that are troubled with achs of the gout, let them go to the Bath in this or the thies following months.

May Observations

June Observations.

July Observations.

August Observations.

September Observations.

October Observations.

November Observations.

December Observations.

In this and the next month cut down timber, in the last quarter of the year mow the crops of grain;—see the bees and pease, rather all the best flowers and herbs from frosts and storms with all rotten possessing, look well to your cattle, water all deep moist pastures, buy or lose blood, and drink good home and strong drink, keep the hoby home, clay, by the same water and dry, cast all care from you, and relieve that you are want both the winter;—this is the best and best of all seasons which is the best time for the abominable, make good use of them, and give the clergy vale.

The beginning, continuance, and ending of the Kings Reigns since the Conquest, with the time how long it is nec, to this Year, 1675. Being fit for Scriveners, and such as are employed in Law cases.

The beginning and ending of the Terms.

Hilary } The first of *Hilary* term shall be
 } On *January* the twentie three:
 } And on the twelfth of *February*
 } This Term doth end most certainly. } Term.

Easter } And *Easter* term from *Easter* day
 } The Wednesday fortnight 'gins alway:
 } And when th' *Ascension* day is past,
 } Till Munday next this term doth last. } Term.

Trinity } On Friday after *Trinitie*:
 } This term begins assuredly:
 } And, as our Lawyers all do write,
 } It ends the Wednesday fortnight. } Term.

Mich. } If *Michaelmasse* term you seek to find,
 } The 24 of *October* bear in mind:
 } It ends, as I do well remember
 } The twentie eighth day of *November*. } Term.

Short lines Terms commence and end-
 be the of ing.
 Long times cares, turmoils, spend-

The Anatomy of Mans body, as the parts thereof are by Astrologers attributed to the 12 signes of the Zodiack.

V Head and face,

♈ Neck and
throate
♊ Breast, sto-
mack & ribs:
♍ Bowels and
belly.
♎ Secret mem-
bers
♏ Knees

♊ Arms and
shoulders
♋ Heart and
back.
♌ Rines and
loynes.
♍ Thighs
♎ Legs.

♏ The Feet.

Should I but dare to omit the Anatomy,
Which long enough hath gull'd my countrey friend,
He with contempt would straight refuse to buy
This book, and 'tis no Almanack contend.
Ask him its use, he'll say he cannot tell;
No more can I: yet since he loves 't so well,
I'll let it stand, because my book should sell.

Reader, would'st know when Easter here will fall,
What's Sunday letter, when will be leap year,
The Golden number, and the new moons all
In February? these right under here
By their respective titles doe appeare.
Also Vermilion figures shew at Rome
How much before our Easter theirs doth come.

The use of the two former tables.

IN the first table, and the first columnne or space, you have the year of our Lord, beginning at 1601, &c.

In the next space, the Golden number for every yeare; as for 1601 the Golden number 6, &c.

In the third space, the day of the change of the moon in February; as in 1601 the moon changed February 22.

In the fourth space, how Easter day falleth every yeare; as in 1601 Easter was April 12.

In the fifth space, the number of dayes differing betwixt the *Romane* or *Gregorian*, and our account in *England*, for the keeping of Easter (and so by consequence all other moveable feasts thereon depending;) as in 1601 there was no difference, but in 1602 the *Romanes* kept their Easter 7 dayes before us; and in 1603 they kept their Easter 35 dayes, that is, 5 weekes before us.

And in the last two spaces you have the Leap-yeer, and Sunday letter; as in 1601, 1629, and 1657, the Sunday letter D, and the first after leap-yeare, &c.

The use of the second table.

In this second table you have in the first place the Sunday letter, and in the next the Golden number whatsoever it be, from 1 to 9 inclusive.

The use whereof is, that for any yeare you (knowing the Golden number, and Sunday letter) may there find the moveable feasts.

Example.

By the first table this present yeare 1642, I find the Golden number 9, and the Dominicall letter B: then in the second table, and in the space answering B, I seeke for the Golden number 9, which I find in the third line of that table, answering B, and against it in the same line, from Christmass to Shrove Sunday is 8 weeks and one day: Shrove Sunday February 20. Easter day April 10. Rogation Sunday May 15. Whit-Sunday May 29. Advent Sunday November 27. and the like for any other yeare.

A true computation of memorable Times.

From the Creation to Noahs Flood, Gen. 5. c. & 7. 11	1056
From the Flood to Abram, Gen. 11. 32. 12. 4. Ab. 7. 4.	353
From Abrams birth to Terahs death, Gen. 11. 32. and 12. 4.	75
